**Tools and Technologies :** PostgreSQL, Figma, Express, Bootstrap, jQuery, Node.js, Azure

**Technical Electives :** Object Oriented Programming, Database Management System, Software Engineering

## EXPERIENCE

**Summer Internship**

📅 May 2022 - July 2022

- In this project, we worked on a very interesting topic of developing a web interface for Robot Operating System.
- We used HTML, CSS, and Javascript to create web-page. All our work is managed through the ROS development studio. Here ROSject is a ROS project packaged in Ros Development Studio, which enables maintaining all work and materials.
- **Guide:** Prof.Tapas Kumar Maiti

## PROJECTS

**Entertainment booking System**

📅 August 2021-December 2021

- Designed a Database for Entertainment Booking System on pgAdmin4 to give a better scenario and management for current online booking problems.
- Tried to provide various functionalities like Insertion, Deletion, Show Table, Search, etc.
- **Guide:** Dr. Minal Bhise

**Supermarket Application**

📅 June 2020 - July 2020

- In this project, I utilized some important topics like Inheritance, Class, Structure and I choose Linked List to store and access all the records.I made a billing system that is capable to print the bill for the given orders.
- **Guide:** Prof. Bakul Gohel

**Recipe Application**

📅 March 2022-April 2022

- Build a food base Application name cookpad, Basically it works as a recipes feed, where you can check and search what kind of food you want to cook, or just to appreciate news recipes.
- **Guide:** Prof. JayPrakash Lalchandani

**Simon Game**

📅 January 2023

- Simon is an app game of short-term memory skill. The app creates a series of tones and lights and requires a user to repeat the sequence.
- In this game, I have used knowledge of Javascript and DOM manipulation, for webpage creation I have used HTML and CSS.
